

July 2026 President's Message

Over the past year, I've shared that the Board has been working on a long-term plan for our amenities with the goal of finding ways to reduce—and, if possible, eventually eliminate—POA dues while ensuring our community amenities remain strong and financially sustainable. As the discussions of the future have continued, we've become aware of rumors suggesting that several of our remaining amenities are being considered for sale. I want to assure you that this is not the case.

The Board remains fully committed to preserving and strengthening the amenities that make Diamondhead such a special place to live. These include our pools, The Club and its grounds, our golf courses, and the many programs, activities, and services associated with them. These amenities are an important part of our community's identity, and we are dedicated to protecting and enhancing them for current and future residents.

Our focus continues to be on identifying the best long-term management and business solutions that will allow these amenities to thrive while reducing the financial burden on our members and encouraging greater participation throughout the community. We believe a stronger membership base and sound, sustainable planning will help secure these valuable assets for years to come.

Diamondhead has long been recognized as a premier recreational community known for its beautiful green spaces and exceptional quality of life. The Board remains committed to preserving that legacy through thoughtful planning and responsible stewardship.

Thank you for your continued interest, your thoughtful feedback, and your support as we work toward a strong future for Diamondhead. We also appreciate your help in sharing accurate information with your friends and neighbors as we continue implementing the goals and plans that will benefit our entire community.

Nancy Sislow
President
Diamondhead Property Owners Association
